

Web building assignments

Simple home page

Objectives

When you have completed this worksheet you will have created a home page for a hotel in a nearby resort

What you need to know

- the basic `<tags>` that structure the webpage
- `<tags>` for underlining, making text bold, changing a fonts style...
- how to change the `<body>` tag to include either a background colour or image
- how to place an image
- `<tags>` for introducing a horizontal line and breaking to a new line
- How to adjust the `<image>` tag to allow text to flow around the image

Tasks

You have been asked by the owners of a hotel to design a web page for them. Nothing fancy or complicated is required. The owners have discussed what they would like and have come up with the following description. Your task is to produce a page that looks like the design.

<h1><i>Big Pond Hotel</i></h1>	
Picture of hotel from outside	Description of hotel. To include information such as: <ul style="list-style-type: none">○ Number of rooms○ How many rooms have a view○ How many restaurants○ What kind of entertainment there is in the evenings○ Distance from beach○ Activities for children
Information on prices: <ul style="list-style-type: none">○ High season (summer)○ Low season (winter)○ Other times of year	Picture of garden/beach/pool
Last updated on: 99, xxxx 200x Webmaster: yourname, yourname@bigpondhotel.com	

Background colour to be either pale blue or yellow

All text to be in the font ***Magneto*** but of size and colour of your choice.

Colour must always provide a high contrast with background
